*One
Thing
Well*

Sudoku OTW is one of a class of apps under the OTW umbrella. OTW (One Thing Well) apps are designed to focus on a single task, and provide the tools you need to accomplish that task.

Rather than add lots of options (and cost) that most people don't need, we prefer to use that development effort to provide more tools you do need: rather than doing many things poorly, doing One Thing Well. OTW allows us to keep our apps simple, effective, efficient, and inexpensive. Thank you for your support.
